High Risk of Rip Currents Remains in Effect through Sunday

The National Weather Service (NWS) Guam Weather Forecast Office maintains a **high risk of rip currents** in effect for Guam, Rota, Tinian, and Saipan through late Sunday night along east facing reefs. Rip currents can sweep even the best swimmers away from the shore into deeper water. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to avoid dangerous rip currents. Inexperienced swimmers should remain out of the water while the advisory is in effect.
